Note from the Editor

In 2018, BCC Research is set to exceed 600 publications of technology focused market research reports across array of market categories ranging from advanced manufacturing and energy to photonics and biology. The materials collections, which includes categories such as advanced materials, chemicals, plastics, membrane and separation technology, fuel cell batteries, and semiconductors make up approximately 30% of the publication volume. To reach this level of publication output and still maintain the highest level of quality in our reports, BCC Research has expanded its network of independent analysts and have more than doubled its internal production and quality control staff. In spite of these unprecedented investments, mistakes can still occur (though few and far in between).

This report was pulled from the BCC Research online library on Feb. 28, 2018. Our research team, including the independent analysts who originally produced the report, tirelessly worked to identify and correct the issues. For this reposted report, the market data tables and their associated text and figures below have been updated to reflect the recent findings from the updated research. Updates were made to Figure 1, and Tables 47 and 75-81.

As the Senior Editor for the Materials Collection, we will strive to offer the highest quality product. Do not hesitate to reach out to us with suggestions or if you have questions.

Most sincerely,
Gordon Nameni, PHD
