

3D Cell Culture: *Technologies and Global Markets*

May 2017

Robert Hunter

Report Code: BIO140B

Table of Contents

Chapter 1: Introduction	1
Study Goals and Objectives.....	1
Reasons for Doing the Study.....	1
Scope of Report.....	1
Intended Audience.....	1
Methodology and Information Sources.....	2
Analyst's Credentials.....	4
Related BCC Research Reports.....	4
Chapter 2: Summary and Highlights	6
New Applications Identified Since 2015 Report	7
Changes from 2015 Report.....	8
Chapter 3: Market and Technology Background	11
Tissue and Cell Culture.....	11
Tissue	11
Cells.....	12
Cell Types.....	12
Tissue Culture and Cell Culture Definitions	13
Obtaining Cell Cultures	14
Isolating Cells from Tissues	14
Maintaining Cells in Culture	14
Plating Density and Sub-culturing	14
Cryogenic Storage.....	15
Obtaining Cells from Other Sources: Issue of Cross-contamination	15
Cell Types Based on Morphology.....	15
Cell Types Based on Hybridomas	16
Cell Culture: Basic Requirements.....	16
Avoiding Contamination.....	16
Important Indicators of Cell Culture Health	16
Maintaining Optimal Cell Culture Conditions.....	17
Basic Cell Culture Systems	17
Adherent Cells Requiring Attachment Substrate	17
Suspension Cell Cultures	17
History and Early Applications	18
Invention of Tissue Culture	18
Development of Sustained Cell Lines.....	18
First Cell Culture Flask and Rigorous Techniques.....	18
Lindbergh: The Cell Culture Equipment Pioneer.....	19
Establishing Continuous Cell Lines	20
Key Developments in Equipment	20
Vaccine Development as Catalyst	21
Cell Strains and Cell Lines.....	22
Vaccines Developed Using Human Cell Strains	22
Continued Catalyst	23
Chapter 4: Tissue and Cell Culture Systems Landscape	26

Large-Scale Manufacture of Biopharmaceuticals and Vaccines	27
Suspension Proteins and Monoclonal Antibodies.....	27
Adherent-Cell-based Therapies and Vaccines.....	27
Small-Scale Adherent to Make Somatic Cells, Stem Cells and Tissues	27
Technology Overview by Cell Culture Type	28
Suspension Approaches	28
Innovation and Challenges	29
Single-Use Technology	30
Mini- and MicroBioreactors: Clone Selection and Development.....	31
Adherent Approaches	32
Traditional Roller Bottles.....	32
Other Systems	32
New Understanding of Cell Attachment and Detachment	34
Three-dimensional Bioreactors.....	34
Applications in Regenerative Medicine	34
Tissue Culture – Early 3D Pioneers	36
Revenue Estimate	37

Chapter 5: Research Landscape and Products Used in Three-dimensional Cell

Culture	39
Microplates	39
Standards Setting	39
Continuous Innovation.....	40
Microplate Readers	40
Liquid-Handling Equipment.....	41
Cellomics Overview.....	41
Fluorescence as Driver of Screening	41
High Content Screening.....	42
Imaging Advances.....	42
Flow Cytometry	43
Future Vision for High-content Screening.....	43
Label-Free Platforms	44
Electrophysiology	45
Assays and Assay Kits	46
Cell-Based Assays: Overview and Newer Developments.....	47
Cells Used in Cell-Based Assays.....	48
Two-dimensional Cultures vs. Three-dimensional Cultures	49
Key Suppliers.....	49
Basic 3D Cell Culture Variables	52
Cell Adhesion.....	52
Cell Migration	53
Cell Invasion.....	53
Viability and Cytotoxicity.....	53
Cell Signaling and Communication.....	54
Enhanced Functionality and Confirming Assays.....	54
Cytotoxicity: A Major Category	55
Permeability Assays for Cell Viability and Survival.....	56
Metabolic Assays for Cell Viability and Survival.....	57
Cell Death Assays.....	58
Cytostatic or Long-Term Impact Assays	59
Multiplex Assays.....	59

Composite Screening Strategies.....	60
High Throughput Screening (HTS) Applications.....	60
Three-dimensional Cytotoxicity Applications.....	61
Correlation with Gene-Expression Data.....	62
1,536-Well Formats.....	62
Kinetic Metabolism Assays.....	63
3D Assay Open Innovation Platform.....	63
Chapter 6: Three-dimensional Technologies and Basic Products	66
Microtiter Plates Provide Platform	66
Supportive Standards	66
Microplate Well Inserts	67
Three-dimensional Cell Culture Technologies	67
Three-dimensional Adoption Status.....	67
Importance of 2D vs. 3D Systems	67
Paracrine vs. Autocrine Signaling	68
Basic 3D Cell Culture Variables	68
Cell Adhesion.....	68
Cell Migration	68
Cell Invasion.....	69
Basic Assay Types	69
Three-dimensional Technology and Products	69
Three-dimensional Matrices to Replicate the Extracellular Matrix	69
Foundational Tools: Gels and Basement Membranes	69
Scaffolds	70
Examples of Innovation	72
Scaffold-Free Formats	74
Applications Overview.....	75
Analytical Methods.....	80
Imaging	80
Liquid Handling.....	80
High-throughput Screening Capability	81
Continued Spheroid Adoption.....	81
Organotypic Models	82
Directional Culture	84
Microfluidics	84
Glass/Silicon-Based Platforms.....	84
Polymer-based Platforms.....	85
Chip Technology	88
Organ/Tissue-On-Chip Industry.....	91
Bioprinting.....	94
Current Dominant Technologies	95
Bioprint Instrument Industry.....	99
Bioink Technologies.....	101
Bioink Industry.....	104
Applications	108
Toxicology Testing in Cosmetics.....	110
Organs and Organoids	113
Organoids	113
Tissue Engineering in Regenerative Medicine	113
Skin Substitutes Industry	116

Recent Example: Skin and Hair	118
U.S. Regulatory Status of Bioprinted Products	118
Organ Transplants.....	121
Acquisitions and Strategic Alliances.....	122
Regenerative Medicine	123
Future Challenges.....	124
Increasing Integration and Evolution	125
Revenue Summary	125
Market Estimate.....	125
Chapter 7: Three-dimensional Models for Cancer	127
Cancer at the Cellular Level Overview	127
Approaches to Date	128
In Vivo (Animal) Testing Standard.....	128
Xenografts	128
Two-dimensional Learnings and Drawbacks.....	128
Three-dimensional Requirements	130
Cell Number and Viability.....	130
Migration and Invasion.....	130
Unmet Needs: Angiogenesis and Immune System Evasion	130
Three-dimensional Benefits to Cancer Research.....	130
Greater Distinction in Cell Morphology and Proliferation	130
Greater Gene Expression and Cell Behavior	131
Better Models of Cell Migration and Invasion	131
Cell Heterogeneity.....	131
Breast Cancer as a Driver of Three-dimensional Cultures	132
Structure, Polarity and Apoptosis	132
Melanoma as a Driver of Three-dimensional Cultures	132
Moving to Spheroid Configurations	133
Three-dimensional Systems in Cancer Research	134
Multicellular Tumor Spheroids.....	134
Multilayered Cell Cultures.....	135
Three-dimensional Engineered Scaffolds	136
Natural Materials	136
Synthetic Materials.....	137
Learnings from Drug Sensitivity and Resistance	137
Altered Signaling and Sensitivity	137
Drug Resistance.....	137
Cellular Signaling.....	138
Cellular Signaling Mediated by Integrins.....	138
Drug Screening.....	138
Approaches and Endpoints	138
Spheroids Applications	139
Metastasis via Three-dimensional Cell Migration Model	141
Metastasis via Lung-on-Chip	142
Cancer Metabolism	142
Future Horizons.....	143
Metastases	143
Co-culture.....	143
Vascularization	143
Cancer-associated Fibroblasts.....	144

Cancer Stem Cells	144
Combination Therapies	144
Biologics Development.....	145
Tumor Recurrence.....	145
Patient-derived Cells.....	145
Patient-derived Tumor Xenografts.....	145
Evolution of PDX Platforms	145
Ex Vivo Models.....	146
Ex Vivo Applications	146
Ex Vivo Shortcomings	147
Ex Vivo PDX in 3D Cell Culture.....	147
Combining Ex Vivo with NGS.....	148
Preserving Heterogeneity in Cancer Models.....	148
High-Throughput Drug Screening.....	149
Revenue Forecast.....	150
Chapter 8: Landscape for Toxicology and Drug Safety Testing	152
Toxicology Background	152
Testing for Adverse Effects on the Skin.....	152
Toxicology Testing in Cosmetics.....	153
Updated Regulatory Requirements.....	154
Efficacy of Cosmetics and Cosmeceuticals.....	155
Bioprinting.....	155
Skin Irritation	155
Skin Corrosion	156
Phototoxicity	156
Skin Sensitization.....	157
Eye Irritation.....	157
Acute Systemic Toxicity	158
Acute Toxicity Testing	159
Cytotoxicity Assays for Acute Toxicity Testing	160
Chronic and Repeated Dose Toxicity	161
Chronic and Repeated Dose Toxicity Study Goals.....	162
Development of Repeated Dose Toxicity Testing In Vitro	163
Carcinogenicity and Genotoxicity	164
Overview	164
In Vitro Methods: Background and Recent Developments.....	164
Regulatory vs. Drug Development Applications.....	165
Efforts to Reduce False Positives.....	165
Recent Innovations for Screening	166
Future Challenge: Non-Genotoxic Carcinogens	167
Reproductive and Developmental Toxicity.....	167
Background.....	167
Following the Reproductive Cycle.....	167
Development and Reproductive Tox Testing Types.....	169
Zebrafish Model for Developmental Toxicity Screening	169
Combinations of Zebrafish and Stem Cells.....	170
Biomedical Frontiers: Male Testis	170
Endocrine Disruptor Screening	171
Background.....	171
Environmental Toxicology Impacts In Vitro Methods	171

High-Production Volume Chemicals.....	172
ToxCast and Tox 21 Initiatives.....	173
Future Challenge: Thyroid Disruption.....	173
BG1 Assay.....	173
Toxicokinetics and ADME.....	174
In Vitro Developments.....	175
Metabolism.....	175
Pharmacokinetics of Low Turnover Compounds.....	178
Organotypic Models.....	179
Three-dimensional Models for Skin.....	179
Three-dimensional Corneal System.....	180
Absorption Barrier Models.....	180
Gastrointestinal.....	180
Lung.....	181
Blood-Brain Barrier.....	181
Blood-Brain Barrier on a Chip.....	182
Real Architecture for Three-dimensional Tissue Barriers and Extracellular Matrix.....	183
Liver Toxicity.....	184
Uniqueness and Complexity of Liver.....	184
Liver as a Key Driver for Three-dimensional Innovation.....	184
In Vitro Liver Applications.....	185
Liver Toxicity Testing.....	185
Primary Hepatocyte Use.....	185
Learnings From Monolayer Cultures.....	185
Learnings from Co-Cultures Contribution to the Development of Cytotoxicity and Three-dimensional Assays.....	186
In Vivo Liver Function and Structure.....	186
Hepatocytes or Parenchymal Cells.....	186
Specialized Liver Endothelial Cells.....	187
Endothelial Cells Surround Hepatocyte Core.....	187
Non-Parenchymal Stellate and Kupffer Cells.....	187
Liver Metabolism.....	188
Sub-Cellular Liver Enzyme Fractions.....	188
Extracellular Matrix as a Driver of Differentiation.....	189
Toxicity Studies and Non-Parenchymal Cells Drive In Vitro Development.....	189
Challenges.....	189
Liver In Vitro Models.....	190
Isolated Perfused Rat Liver.....	190
Precision-Cut Liver Slices.....	190
Human Hepatocyte Isolation.....	190
Isolated Hepatocyte Shipping.....	191
Co-Cultures of Hepatocytes and Macrophages.....	191
Two-Chamber Systems.....	191
Micropatterning.....	192
Three-dimensional Liver Models.....	192
Two-dimensional Sandwich.....	193
Sandwich-Culture Model.....	193
Hydrogel Three-dimensional Scaffolds.....	194
Synthetic Scaffolds.....	194
Self-Assembled Hepatospheres.....	195
Hepatospheres-Derived from Cell lines vs. Primary Cells.....	195

Bioprinted Liver Tissue.....	196
Detected Hepatosphere Structures and Functionality	197
Extracellular Matrix	197
Cell-cell Contacts: Learnings from In Vitro Tox	197
Oxygen Supply	197
Co-culture with Non-parenchymal Cells In Three-dimensional Spheroids	198
Refinements to Co-culture	198
Ideal Criteria.....	199
Drug Resistance.....	199
Transporter Studies.....	199
Achieving Heterotypic Cell-cell Contacts	199
Summary Learnings.....	200
Unmet Needs and Future Drivers of Innovation.....	200
Regeneration	200
Achievement of Hepatocyte Expansion Still Elusive	200
Inflammation Models	201
Immune-mediated Drug-induced Liver Injury.....	201
High-content Imaging and Analysis	202
Stem Cell-Derived Hepatocyte Potential.....	203
Morphogen Signaling.....	203
Microfluidics Applications.....	204
Dielectrophoretic Forces	204
Learnings from Microfluidics.....	205
Self-organizing Systems.....	206
Multi-Donor Liver Cells	208
Kidney Toxicity Applications	208
Future Challenge: Stem-Cell Derived Kidney Cells.....	209
Bioprinted Kidney Tissue.....	209
Pancreatic Toxicology Applications.....	210
Cardiovascular Safety Testing of New Drug Candidates.....	210
Commercial Avenue	210
Collaboration with Regulators.....	211
In Silico: Model-Based Drug Development.....	212
Microelectrode Arrays Based on Impedance	213
Surrogate for Aortic Ring Assay via Bioprinted Magnetics	214
Vasodilator Activity	215
Three-dimensional Engineered Heart Tissues.....	215
Revenue Estimate	215
Chapter 9: 3D Culture Role in Stem Cells	218
Introduction	218
Early Learnings	218
Embryogenesis.....	219
Growth, Structure and Morphology.....	219
Differentiation	219
Differentiation vs. Proliferation	219
Extracellular Matrix	220
Soluble Factors	220
Mechanical Forces.....	221
MicroRNAs.....	221
Three-dimensional Stem Cell Culture Systems.....	221

Plate or Culture Dish	221
Spinner Flask and Rotating Wall Vessel.....	221
Perfusion Bioreactor and Microcarrier Systems	221
Shortcomings.....	222
Controlling Embryoid Body Formation	222
Forced Aggregation Cultures.....	222
Hanging-Drop Approach.....	223
Applications.....	223
Stem Cell Microenvironments.....	223
Stem Cell Markers for High-throughput Screening.....	224
Teratomas and the Teratoma Assay.....	224
Status and Drivers.....	225
Fujifilm (Cellular Dynamics Inc.).....	225
Breakthroughs Resulting from Stem Cells Research.....	226
Revenue Estimate	226
Chapter 10: Three-dimensional Next-Generation Outlook.....	228
Overview	228
Cancer	229
CDx Based on Ex Vivo 3D.....	229
Immuno-Oncology.....	229
Predictive Toxicology	230
Neuro Safety.....	230
Stem Cells for Neuroscience Discovery and Development.....	231
Example: Alzheimer’s Research.....	231
Background: B-Amyloid Cascade Hypothesis	231
Human iPSC-derived Models.....	232
New 3D Model.....	232
Other 3D Advantages	233
Envisioned Applications	233
Other 3D Neuro Applications	234
Stem Cells for Cardiovascular Discovery.....	234
Stem Cells for Development of Regenerative Medicine.....	235
Background: Allogenic vs. Autologous	235
Induced Pluripotent Stem Cells (IPS).....	236
Revenue Estimate	237
Chapter Appendix: Liver.....	238
Integration with “-Omics”	238
Chapter 11: Company Profiles	243
Appendix: Patent Analysis.....	287

About BCC Research

About BCC Research

With our unparalleled 45-year history, BCC Research provides comprehensive analysis of global market sizing, forecasting and industry intelligence, covering markets where advances in science and technology are improving the quality, standard and sustainability of businesses, economies and lives.

BCC Library Access

From market sizing and forecasts, to opportunity assessments and competitive analyses, our ever-expanding library gives you the data, insights and intelligence required to ensure your project is a success. With myriad options for access to fit all needs and budgets, call 866-285-7215 or email info@bccresearch.com to request a demo.

BCC Custom Research

Our experts provide custom research projects to those working to identify new markets, introduce new products, validate existing market share, analyze competition and assess the potential for products to impact existing markets. With impressive academic credentials and broad and deep knowledge of global industrial markets, our independent analysts and consultants develop the facts, figures, analysis and assessments to inform the decisions that will move your company ahead. Confidential inquiries to: custom@bccresearch.com or 781-205-2429.
