CHAPTER TWENTY SIX: REMOTE SENSING PATENT REVIEW.....	182
21 ST CENTURY PATENTS	182
TO AUGUST 2011.....	182
Systems and methods for transparency mapping using multipath signals	182
Systems for measuring backscattered light using rotating mirror.....	182
System and methods for remote sensing using double- sideband signals	183
Method for correcting weather data	183
Remote Sensing of Wave Heights Using a Narrowband Radar Arrangement	184
Radar imaging system and method using directional gradient magnitude second moment spatial variance detection device	184
Remote-sensing method and device.....	185
Image processing system and image processing method for aerial photograph.....	185
Remote Sensing of Wave Heights Using a Broadband Radar Arrangement	186
Method and apparatus of correcting geometry of an image ...	186
Sound sources separation and monitoring using directional coherent electromagnetic waves	187
Ultraviolet, infrared, and near-infrared lidar system and method	187
Derivation and production of high-resolution, very short- term weather forecasts.....	188
Compression Assembly Of Spatial Heterodyne Spectrometer	188
General Line Of Sight Stabilization System	189
Cryogenically Cooled Adjustable Apertures For Infra-Red Cameras.....	189
Cross-Component Superconducting Gravity Gradiometer With Improved Linearity And Sensitivity And Method For Gravity Gradient Sensing	190
Vehicle Based Data Collection And Processing System	190
Time Domain Electromagnetic Analysis And Inspection System For Conduits.....	191

Volume-Phase Holographic Diffraction Grating Optimized for the Ultraviolet Spectral Region	191
Terahertz Imaging For Near Field Objects	192
Multispectral Multipolarization Antenna-Coupled Infrared Focal Plane Array	192
Image Processing Method and Apparatus Using Self- Adaptive Binarization	193
Digital FTIR Spectrometer.....	193
Matrix Transposition in a Computer System.....	193
On/Off Keying Node-To-Node Messaging Transceiver Network with Dynamic Routing and Configuring	194
Method and Apparatus for the Estimation of the Temperature of a Blackbody Radiator	194
Temperature Measurement Device	195
2000 TO 2005.....	195
Systems and Methods for Analyzing Particle Systems Using Polarized Scattered Light	195
Control of an Optical Fiber Scanner.....	196
Near-IR Human Detector.....	196
Apparatus and Method for Real Time IR Spectroscopy.....	197
VCSEL Assembly with Edge-Receiving Optical Devices	197
Sonar-Controlled Apparatus for the Delivery of Electromagnetic Radiation	198
Mapping Air Contaminants Using Path-Integrated Optical Remote Sensing with a Non-Overlapping Variable Path Length Beam Geometry	198
Methods, Systems and Computer Program Products for Generating Weather Forecasts from a Multi-Model Superensemble	199
Distributed Feedback Surface Plasmon Laser.....	199
Infrared Imager Using Room Temperature Capacitance Sensor	200
Aerosol Hazard Characterization and Early Warning Network	200
Tactical Thermal Luminescence Sensor for Ground Path Contamination Detection.....	201
Measurement of Brightness, Flow Velocity and Temperature of Radiant Media	201
Dynamic Light Scattering at Multiple Discrete Wavelengths, Using Multiple Mono-Mode Fibres or for Detecting the Velocity of Scattering Sensors.....	202
Area Receiver with Antenna-Coupled Infrared Sensors.....	202
Land-mine Detector with a High-Power Microwave Illuminator and an Infrared Detector	203

Wavelength-Tunable Coupled Antenna Uncooled Infrared (IR) Sensor	204
Microvalve and Microthruster for Satellites	204
Imaging Spectrometer/Camera Having Convex Grating.....	205
Polarization-Tunable Antenna-Coupled Infrared Detector	205
20 TH CENTURY PATENTS	206
1990 TO 1999.....	206
Detector of Halogenated Compounds Based on Laser Photofragmentation/ Fragment Stimulated Emission	206
Radiation-Hard, Steady-State Imaging Bolometer.....	206
Method and Apparatus for Spectral Analysis of Images	207
Method and Apparatus for Measuring Road Surface Conditions.....	207
Remote Contamination Sensing Device for Determining Contamination on Insulation of Power Lines and Substations	208
Silicon Coated Mylar Beamsplitter.....	208
Spectrometry Using an Optical Parametric Oscillator	209
Fast Pattern-Detection Machine and Method.....	209
Passive Optical Wind Profilometer.....	210
Oceanographic and Meteorological Data	210
Uncooled Tunneling Infrared Sensor.....	211
Pulsed Intracavity Nonlinear Optical Frequency Converter	211
High-Resolution Passive Microwave Sensors for Earth Remote Sensing	212
Image Processing and Map Production Systems	212
1980 TO 1989.....	213
Method and Apparatus for Simulating Phase Coherent Signal Reflections in Media Containing Randomly Distributed Targets.....	213
Image Analyzing Apparatus	213
Apparatus and Method for Remote Sensing of Gases, Vapors or Aerosols.....	214
Pressure-Sensitive Optrode.....	214
Process and Equipment for Determining the Density of a Loaded Drilling Fluid from a Deep Well, in Particular an Oil Well.....	215
1970 TO 1979.....	215
Differential Doppler Velocity Sensor	215
Signal Processing in Short-Pulse Geophysical Radar System	216
Ground Radar System	216

Method for Processing Three-Dimensional Seismic Data to Select and Plot Data on a Two-Dimensional Display Surface	217
Method and Apparatus for Seismic-Magnetic Prospecting	217
Determination of Time Displacement between Common Information in Seismic Signals.....	218
CHAPTER TWENTY SEVEN: THE REMOTE SENSING COMMUNITY	219
